

ONE ROOM HOUSE - WINDOWS

(H)

The windows were built high up on the wall. They were very narrow.

There was no glass for the windows. Strips of wood or leather made a lattice covering. This kept out robbers. There were no police in Israel then.

Smoke went out the little windows. The window let a little breeze and sunlight into the house. Insects and birds could fly into the house too.

If the window was high enough no covering was made for it.

Once a young man listened to Paul preach. He was sitting in a window. It was a high window (the 3rd story). There was no covering. This man fell out the window. (See Acts 20:8-9)
